

This is a note in support of XM Radio transmitting Traffic and Weather. As an XM subscriber I think it is absolutely unconstitutional to stop a radio service from offering a service to it's listeners just because other businesses are opposing to it. I personally pay MY XM suscription and that is MY choice. Congress doesn't have the right to stop a service that's being rendered to ME if I decide to receive it. The AM and FM stations just need to improve their programming and compete. That will just give us listeners and consumers BETTER choices and not take away other choices. Also, the Traffic and Weather reports through XM are not the only ones we listen to. As I'm driving around the DC Metro area every day I listen to all the traffic and weather reports I can to have an even better idea of the current conditions. The three of them together (AM, FM and XM) are better than only two. Please think about the consumers not the companies that want to monopolize the! money.

Thanks,

Hector I. Caro
XM, FM and AM radio listener
